8 February 2024

Dear Parent/Carer,

At the beginning of the 2023-2024 academic year, we launched our new resource Complete Maths Tutor.

Complete Maths TUTOR is an Intelligent Tutoring System, which brings the benefits of traditional tutoring, but through clever technology. It continuously diagnoses your child's Maths attainment to respond to their individual needs.

Your child has been introduced to the system in school and has access to their account. They should have had a chance to complete the initial diagnostic assessment, which helps to identify where they should begin working. One of the aims of the system is to identify and address any gaps in your child's knowledge that might otherwise hold them back. They will also have been set a 'course' to work on and their weekly homework will be to complete a number of 'Goals' within the course. This means that their homework is bespoke to them.

The content in the system is organised into 'Courses', which contain 'Ideas', each of which is split into 'Goals'. When they are set work, it will be to complete a certain number of Goals. They are of course encouraged to work independently on more content than that which has been set. There is also a 'Memory Boost' section, which is a daily set of five questions that allow them to practice content they have worked on recently. This works well on phones (as does all the content) Why not encourage them to see how long they can continue a daily streak on Memory Boost?

Each Monday your child will be set a homework task to complete 3 goals (Year 7-10) or 4 goals (Year 11), which will need to be completed before 11:59pm the following Sunday. If your child fails to complete the homework, then a sanction will be put in place.

We appreciate your support in encouraging your child to fully engage with Complete Maths TUTOR. The more they engage with the system, the more it will help them to achieve excellent progress and ultimately results in Maths.

Yours sincerely

Samantha Grocock
Head of Maths
